

CLEANING ON SEALED SURFACES.

DAILY:

- Mop up any spills immediately.
- We recommend cleaning with warm water and a small amount of SOLUTIONS – Sealers '**NATURAL CLEAN**'.
- '**NATURAL CLEAN**' is a super concentrated, non-acidic, phosphate free neutral cleaner. It eliminates soap scum build-up and hard water deposits leaving no residue, when used regularly. *Less is BEST!*

STUBBORN STAINS:

1. Greases, soap scum, heavy grime build-up and mildew stains.

- Mop up any spills immediately.
- We recommend cleaning with a diluted, bio-degradable phosphate free alkaline cleaner, SOLUTIONS – Sealers '**D-GREASE**'.
- **D-GREASE** is industrial strength and must be diluted in accordance with instructions on the product for 'normal cleaning'.
- **EXCESSIVE /UNDILUTED USE OF PRODUCT WILL DAMAGE SEALED SURFACE**

2. Materials which contain colouring matter such as tomato sauce, cheese, dairy products, food colouring, tea and red wine.

- Mop up any spills immediately.
- We recommend cleaning with *good quality* bleach. Please read the instructions for cleaning on the bleach bottle and carefully follow dilution instructions.

3. In ground dirt, scuff marks etc.

- Mop up any spills immediately.
- Apply small amount of SOLUTIONS – Sealers '**MISTER CLEAN**' cream cleanser and work into *effected area only*.
- Keep cleanser moist with water and/or small amount of SOLUTIONS – Sealers '**NATURAL CLEAN**'

We do not recommend using solvent based cleaners such as xylene, acetone, mineral turps, kerosene, methylated spirits, rust and scale cleaners/removers, lime cleaners or any acidic cleaner on a **sealed** surface.

CLEANING CAUTIONS:

Cleaners containing acid should *never* be used for routine maintenance. Acidic cleaners, even a light solution of vinegar and water, will etch polished **natural stone** and eventually damage tile. Acidic cleaners will also cause grout to deteriorate and strip the pigmentation from the grout. Heavy-duty cleaning may only become necessary if tile cleaning has been neglected, if in doubt contact an industry professional.

N.B. ALWAYS TEST ANY cleaning product for suitability on YOUR particular surface.
