SEALERS FOR STONE & TILE

The Next Generation of Stone Care Products

PLUS NATURAL SEALER

Plus Natural Sealer is a high solids state of the art solvent based penetrating sealer, specifically designed for porous surfaces. It contains a carefully selected blend of solvents and resins which are renowned for durability. These resins are deposited in the capillaries of porous surfaces - leaving a barrier against water and oil-borne contaminants, with minimal change to the natural appearance of the surface.

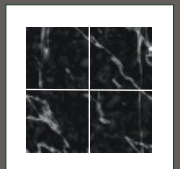

Features:

- Suitable for internal and external use
- Premium long-life solvent-based product.
- Invisible finish which maintains a natural look.
- Allows grout or tiles to "breathe", which means sealing is possible without lengthy delays
- Protects against water-borne and oil-based stains.
- Makes cleaning of tiles easy.
- Higher solids makes it suitable for porous surfaces.

Suitable for:

Terra cotta
Sandstone
Porous granite
Porous limestone
Clay pavers
Concrete pavers

Always Test:

Because every surface is different, we recommend that a small test patch is done to ensure the desired result is achieved.

Coverage:

8-12 sq. metres per litre (1 coat) depending on porosity of the surface. 2-3 coats are recommended. Use Consolidate Stone Densifier as a pre-sealer where necessary.

Technical Specs:

colour: clear
weight: .88kg/lit
solvent: hydrocarbon
pH: N/A
D.G. Class: 3
UN: 1263

Containers:

1lt
4lt
10lt
20lt
200lt
