SEALERS FOR STONE & TILE

The Next Generation of Stone Care Products

PROTEX DENSE STONE SEALER

Protex Stone Sealer is a specialised penetrating sealer for treating low absorptive surfaces such as polished porcelain tiles. The small molecular structure of this sealer means that it penetrates into the microscopic pores of the tile and repels water and oil-borne stains.

Features:

- Suitable for internal and external use.
- Invisible, impregnating material creates an excellent barrier against stains
- Allows tile to breathe
- Makes routine cleaning easier
- Very fine molecules leaving little or no residue on the surface after sealing.

Suitable for:

Polished Marble
Polished Granite
Polished Limestone
Polished Porcelain Stoneware
Natural Porcelain Stone

Always Test:

Because every surface is different, we recommend that a small test patch is done to ensure the desired result is achieved.

Coverage:

20 - 50 square metres per litre (1 coat) depending on the porosity of the surface.

Technical Specs:

colour: clear
weight: .86kg/lit
solvent: hydrocarbon
pH: N/A
D.G. Class: 3
U.N: 1263

Containers:

500ml
1lt
4lt
10lt
20lt
